CONTENTS

Summary / samenvatting	1
Acknowledgements	5
Chapter 1. Introduction and synopsis	11
1. Subduction zone magmatism	13
2. Aims of the thesis	14
3. The Aegean arc – a brief introduction	15
4. Synopsis	18
Chapter 2. Pb isotope analysis of ng sized samples by TIMS equipped with a $10^{13} \Omega$ resistor using a ^{207}Pb-^{204}Pb double spike	23
Abstract	24
1. Introduction	25
2. Principles of the double spike technique	26
3. Analytical techniques	27
3.1. The VUA ^{207}Pb - ^{204}Pb double spike	27
3.2. Ion-exchange chemistry	28
3.3. Mass spectrometry	28
3.4. Data reduction	31
4. Results and discussion	31
4.1. Reproducibility of 75 ng standards with the double spike technique	31
4.2. Measurement of small Pb samples using a $10^{13} \Omega$ resistor	33
4.3. High-precision results for 5 ng standards	35
5. Conclusions	37
Acknowledgements	38
Appendix 1 – The double spike solution	39
Chapter 3. Temporal and spatial variations in provenance of Eastern Mediterranean Sea sediments: Implications for Aegean and Aeolian arc volcanism	47
Abstract	48
1. Introduction	49
1.1. Sediment subduction	49
1.2. Geological setting	49

1.3. Sedimentation in the EMS	50
2. Analytical techniques	52
3. Site descriptions	53
3.1. DSDP site 374	53
3.2. DSDP sites 125 and 126	53
3.3. DSDP site 128	55
3.4. ODP site 971B	55
3.5. DSDP site 130	55
3.6. DSDP sites 375 and 376	55
3.7. DSDP site 378	55
3.8. Libya and Nile surface sediments transects	56
4. Results	56
4.1. TGA analysis	56
4.2. Major and trace elements	57
4.3. Radiogenic isotopes	60
5. Discussion	61
5.1. Mineralogical composition of EMS sediment	61
5.2. Controls on trace element variation	61
5.3. Provenance of EMS sediment	64
5.4. Spatial and temporal variation in provenance	69
5.5. EMS sediment: implications for arc volcanism	71
6. Conclusions	75
Acknowledgements	76

Chapter 4. A distinct source and differentiation history for Kolumbo submarine volcano, Santorini volcanic field, Aegean arc **79**

Abstract	80
1. Introduction	81
2. Geological setting	81
3. Analytical techniques	83
4. Results	84
4.1. Petrography of the Kolumbo suite	84
4.2. Glass geochemistry	86
4.3. Mineral geochemistry	87
4.4. Whole rock geochemistry	88
5. Discussion	93
5.1. Comparison between Kolumbo and recent Santorini	93
5.2. Role of crustal contamination in the evolution of Kolumbo	97
5.3. A distinct source for Kolumbo	98

5.4. Petrogenesis of the Kolumbo suite	103
6. Conclusions	104
Acknowledgements	105
Chapter 5. Unravelling the anatomy of the crustal magmatic system of an arc volcano through mineral and textural analysis: Nisyros Aegean	107
Abstract	108
1. Introduction	109
2. Geological setting	110
3. Analytical techniques	112
4. Results	113
4.1. Petrography	113
4.2. Mineral chemistry	121
5. Discussion	128
5.1. Polybaric differentiation of arc magmas	128
5.2. Evolution of the HPRD suite	130
5.3. Evolution of the LPA suite	137
5.4. Anatomy of the magmatic system of Nisyros	142
5.5. Implications for island arc magmatism	143
6. Conclusions	144
Acknowledgements	145
Chapter 6. Disentangling source heterogeneity from crustal differentiation processes: a geochemical study of Nisyros volcano, Aegean arc	147
Abstract	148
1. Introduction	149
2. Geological setting	150
2.1. Nisyros	150
2.2. Aegean arc basement	151
3. Petrography and the plumbing system of Nisyros	152
4. Analytical techniques	153
5. Results	156
5.1. Major element composition	156
5.2. Trace element composition	156
5.3. Sr-Nd-Hf-Pb isotopes	159
6. Discussion	159
6.1. The Nisyros suite: a single liquid line of descent?	159
6.2. Primary heterogeneity in the Nisyros suite	162

6.3. Open-system differentiation at Nisyros	169
7. Conclusions	177
Acknowledgements	178
Chapter 7. Subslab mantle of African provenance infiltrating the Aegean mantle wedge	181
Abstract	182
1. Introduction and setting	183
2. Analytical techniques	183
3. Results and discussion	184
3.1. Source modelling	185
3.2. Pb-Nd isotope constraints	187
3.3. Geodynamical implications	188
Acknowledgements	189
Appendix 1 – Modelling parameters	190
Appendix 2 – Data sources	191
References	193
